

RETAIL Price List - Valid From January 2021

In-akustik is a brand of high-performance AV cables and connectors engineered and hand-built in Germany since 1977. Guided by the mantra "physics not voodoo" In-akustik mixes the latest science with the best materials and meticulous German engineering and innovation to minimise signal loss in the cable. As its website confirms "the best cable is not the one that gets the most out of a system, but the one that loses the least of the original signal. Cables act like antennae and attract external interference which can only be minimised with technical finesse and the finest materials".

Referenz AIR Speaker Cables

Referenz LS-4004 AIR

Using In-akustik's Air Helix technology the Referenz LS-4004 AIR speaker cable, deploys no fewer than 16 individual conductors separated from each other along the length of the cable. Each conductor is made from 24 high-purity silver or copper wires and has a lacquer coating for extra insulation.
